

FULL QUALIFICATION

Non-RPL Distance Full Qualification (3 modules)

What is this?

Persons with less than 5 years' technical experience in short term insurance can obtain the full qualification in short term insurance via distance learning

Who qualifies?

Any person with Matric and/or NQF Level 4 Short Term Insurance. If not yet completed, a 30 credit skills programme is required. A bridging course is offered by us

What does it entail?

In short, we send you a learner guide and workbook per module. You will use the learner guide to study and assist you in answering the questions in the workbook

The completed workbook, once submitted, will be assessed and feedback provided. A mock exam will be sent to assess readiness to undergo the final assessment, assessed and sent back to you to use in your preparation

Then you write the closed book summative assessment

3 modules to be completed

Any person may enrol and complete the full qualification in Short Term Insurance, although they need to have Matric and preferably the NQF Level

4 Short Term Insurance

qualification, similar or at least a foundational skills programme

We have divided the full qualification into 3 integrated modules. Once all 3 modules with its respective assessments are completed, the full qualification will be awarded. This takes approx 6 - 12 months, depending on your commitment to the process

The process

- You complete the learner registration form and return it with a copy of your ID and Matric Certificate
- You will be invoiced and upon payment we e-mail you the portfolio template and learner guide for module 1
- Using the learner guide and other resources, you will complete the portfolio and return it to us for assessment
- We send you feedback as well as the mock exam
- Once returned, we assess and provide you with feedback
- You then complete the final closed book summative assessment
- This process is repeated for all 3 modules

What do I need?

You will receive learning material from us to complete most of the questions and activities

There is a heavy emphasis on research and only advisable for persons that are disciplined and committed to their own development and learning. There are many activities where you need to research articles for instance and write your own responses, and so forth.

This qualification is not advisable as a foundational qualification in short term insurance - rather complete the Level 4 first

Experience in risk management, corporate or commercial underwriting, corporate governance and knowledge of the economy is advisable

Our material and assessments are simplistic and integrated

Enrolments and exam dates are flexible and done at your workplace

What else you need to know

Matric is a requirement as well as short term insurance credits, or a Level 4 insurance qualification

If you do not finish the process, we will not refund you

All completed assessments must be verified by INSETA, and once approved and uploaded, they issue the certificate

If you are found competent on all three modules, you will be issued with the full qualification as accepted by the FSB

We offer discounts to multiple persons, loyal clients and corporate companies that register more than 20 persons

The Cost

R14 347.83 VAT exclusive

R16 500 VAT inclusive

Includes all assessments and one free opportunity for remediation per module. Thereafter R500 per assessment.
